SOUHIMBOU D. KONE
Albany, NY
518-528-4019 | hello@souhimbou.com
Citizenship: United States | **Clearance:** Secret (Active)
Federal Status: Reinstatement Eligible (Former GS-2210-11) | **Veterans Preference:** 5-Point (Campaign)

PROFESSIONAL SUMMARY:

Cybersecurity Analyst and Technical Innovator with active Secret clearance and Master's-level education. **Former GS-11 IT Specialist** with experience in Title 32 Dual Status Technician operations before Title 10 mobilization in support of **Operation Spartan Shield & Operation Inherent Resolve**.
Inventor of a **patent-pending** post-quantum cryptographic protocol. Seeking to leverage proven federal experience and advanced technical tradecraft in a GS-11/12 capacity.

TECHNICAL INNOVATION & INTELLECTUAL PROPERTY

Inventor, KHEPRA Protocol (Application ID: 73565085) | Patent Pending

- **Strategic Architecture:** Architected **KHEPRA**, a zero-dependency, military-grade (CMMC L2) intelligence sidecar designed for air-gapped (Edge) and contested environments. Engineered the **"Godfather" Risk Engine** to synthesize active telemetry into **Causal Risk Attestations**—immutable, cryptographically sealed proofs of liability.
- **Post-Quantum Cryptography (PQC):** Implemented a native Go cryptographic stack (pkg/adinkra) integrating **NIST-standard Dilithium3** (Digital Signatures) and **Kyber1024** (Key Encapsulation) to ensure data sovereignty and non-repudiation against quantum threats.
- **Proprietary Obfuscation:** Innovated the **Adinkra Lattice** (pkg/nkyinkyim), a novel binary obfuscation logic that weaves cultural symbology into control flow, hardening the agent against reverse engineering and tampering.

TECHNICAL SKILLS

- **Advanced R&D:** Post-Quantum Cryptography (PQC), Air-Gapped/Offline System Design, Zero-Trust Architecture, Causal Risk Modeling, Binary Hardening.
- **Programming & Systems:** Go (Systems Security, Native Tooling, Memory Hygiene), Python (Data Analytics), PowerShell, Bash, SQL.
- **Networking:** TCP/IP, OSI Model, Satellite Communications (SATCOM), VPN Configuration, Active Directory, DNS/DHCP.
- **Security Tools:** Splunk (SIEM), Nessus (Vulnerability Scanning), Wireshark (Packet Analysis), Metasploit, FTK Imager, EnCase, Palo Alto Firewalls
- **Security Engineering:** NIST SP 800-171/53 Compliance, Secure Memory Operations (Wipe/Sanitization), Network Protocol Analysis, Sidecar Design Patterns.
- **Tools & Operations:** Splunk (SIEM), Nessus, Wireshark, Metasploit, FTK Imager, EnCase, Palo Alto Firewalls.
- **AI & Strategy:** AI-Assisted R&D, Prompt Engineering for System Architecture, Technical Deliverable Management.

PROFESSIONAL EXPERIENCE

U.S. DEPARTMENT OF THE ARMY (NY NATIONAL GUARD) | *Deployed: Jordan & Kuwait*
Lead IT Operations Analyst / COIC Battle Desk Manager (Team Lead) | *05/2025 – January 2026*
Campaign Support (Operation Inherent Resolve): Direct the **G6 Battle Desk** within **Command Operation Information Center (COIC)**, supervising a 4-person team in a 24/7 Network Operations Center (NOC). Ensured continuous Command and Control (C2) capabilities supporting kinetic and counter-ISIS operations in a hostile fire zone.
Kinetic Threat Coordination (C2 Node): Orchestrated the fusion of real-time intelligence from **Air Defense Artillery (AMD)** and **G2 Intelligence** assets to track and report imminent threats, including Theater Ballistic Missiles (TBM), Unmanned Aerial Systems (UAS), and Indirect Fire (IDF). Served as the primary communications integrator, disseminating "flash" threat warnings to Coalition partners via **Secure Video Teleconferencing (SVTC)** and classified channels, directly safeguarding personnel during active engagements.
IT & AV Systems Administration: Managed the lifecycle and troubleshooting of critical communications architecture, including NIPR/SIPR endpoints, Blue Force Trackers (JBCP), and Iridium satellite assets. Facilitated high-visibility classified briefings for General Officers and Executive Branch officials via secure enclaves.

Quality Assurance & Compliance: Enforced strict reporting procedures and Standard Operating Procedures (SOPs) for hourly communications checks. Aligned desk operations with **NIST 800-53** controls, ensuring 100% compliance during Command Cyber Readiness Inspections (CCRI).
Logistics & Property Accountability: Selected to cross-train in unit supply operations, assisting the Supply Sergeant with **100% physical accountability** of organizational property. Executed sensitive item inventories and prepared packing lists (DD Form 1750) for the movement of tactical assets. Reorganized and secured logistics containers (TRICON), ensuring the rapid deployability of 12+ OE-254 antenna systems.

U.S. DEPARTMENT OF THE ARMY (DMNA G6/CIO) | *Latham, NY* IT Specialist (Customer Support) – Title 32 Military Technician | ***09/2024 – 05/2025***

- **Grade: GS-2210-11 | Status: Former Federal Employee (Separated for Mobilization)**
- **Cloud Migration & Identity Management:** Led the enterprise migration of end-user endpoints from legacy Active Directory to the cloud-native Army Unified Directory Services (AUDS) via Microsoft Intune. Re-imaged and provisioned 300+ devices to enforce strict DoD compliance standards.
- **Privileged Access Management (PAM):** Entrusted with elevated administrative roles including Device Enrollment Manager **(DEM)** and Privileged Enrollment Manager **(PEM).** Configured and managed Privileged Access Workstations **(PAW)** to secure high-value targets against cyber threats**.**
- **Executive Support:** Provided "white glove" technical support for The Adjutant General **(TAG)** Senior Leadership Symposium **(Nov 2024)**. Directed audiovisual and IT infrastructure setup, ensuring zero downtime for high-visibility command presentations.
- **Incident Resolution:** Served as Tier-2 escalation point for complex hardware/software failures. Developed disaster recovery plans for system failures, significantly reducing downtime for critical state-level operations.

EDUCATION

Master of Science in Digital Forensics & Cybersecurity *University at Albany, SUNY – Albany, NY | Expected Graduation: May 2026*

- **Thesis Focus:** Post-Quantum Cryptography and Agentic AI Security.
- **Designation:** NSA Center of Academic Excellence in Cyber Defense Education (CAE-CDE).

Undergraduate Certificate in Computer Information Systems with Networking Concentration *California Institute of Arts & Technology*| Graduated *November 2022*
Bachelor of Science in Public Health *University at Albany, SUNY – Albany, NY* | Graduated *May 2020*

CERTIFICATIONS

- **CompTIA Security+** (DoD 8570 IAT Level II Compliant)
- **CompTIA A+ | CompTIA IT Fundamentals+ (ITF+)**
- **SUNY Albany- Massry School of Business:** Cybersecurity Risk & Auditing, AI for Business
- **CanCode Communities via SUNY Adirondack:** Certificate in Python for Data Analytics, AI: Machine Learning Foundations

HONORS & AWARDS

Nominee, City of Albany Veterans Banner Program: Selected for public recognition of distinguished military service. (2025)
Norwegian Foot March (Marsjmerket) – Bronze Badge: Earned during deployment to Jordan (2025); completed 18.6-mile tactical ruck march meeting strict time standards.
Combat Veteran Patch- Shoulder Sleeve Insignia-Military Operations in Hostile Conditions (SSI-MOHC): Awarded for service in a designated hostile fire zone supporting Operation Inherent Resolve. (2025)
Army Achievement Medal (AAM): Awarded for 1st place in Soldier of the Month competition during Advanced Individual Training at Fort Gordon, Cyber Center of Excellence (2024)
'Human Book' Nomination (The Human Library Project at SUNY Albany): Selected (2018) to represent unique perspectives on resilience and immigration, fostering community dialogue and cross-cultural understanding.
Academic Honors: SUNY Albany Spellman Academic Achievement Award (2018); UAlbany Multicultural High School Achievers Award (2013).
